The Elephant Interaction, for both young and old, introduces you to Elephant Whispers' six rescued African Elephant. This educational and interactive experience invites you to feel their constantly curious trunks, touch their rough skin, exchange trunk greetings and offer tasty treats, while learning about their behaviour and history from the Handlers. As ambassadors for their species, this elephant herd and their committed and deeply passionate team has an important conservation message to share.

SUDWALA CAVES – The caves are set in Precambrian dolomite rock formed over a period of 3 000 million years, when Africa was still part of Gondwana. The caves formed about 240 million years ago making them the oldest known caves in the world. There are a number of calcium configurations in the cave which are known by attention-grabbing names; the 'Screaming Monster', 'Lowveld Rocket' and 'Samson's Pillar'. The first oxygen producing plants on the earth, Collenia, which formed 2 000 million years ago are also found in the caves.

HOEDSPRUIT CENTRE FOR ENDANGERED SPECIES – A centre focusing on the conservation of rare, vulnerable or endangered animals.
